Rural Water District No. 2
Sedgwick County

P.O. Box 318
Valley Center, KS 67147

Office (316) 755-9888
FAX (316) 755-9777

The Environmental Protection Agency (EPA) previously announced changes to drinking water regulations which now require water suppliers to identify all materials used in the construction of water distribution systems nationwide.

The Kansas Department of Health and Environment (KDHE) is requiring public water supply systems to mail surveys once again to customers who have not yet responded by November 15th, 2026. A full report of Rural Water District # 2 survey responses must be submitted in 2027. The expectation is for the informative trifolds and surveys to continue to be mailed annually until 100% of our customers respond. Both the trifold and the survey are also posted on our website at sedgwickrwd2.com. The survey can be completed, signed, and returned to our email if that is easier. Our email address is water@sedgwickrwd2.com. This is a huge task that requires the assistance of all our water customers.

Sedgwick Rural Water District #2, as the water supplier, must identify all construction materials used on both our side *and the consumer side of the water meter*, which means we need your help!

Thank you for your participation and assistance with this government project.
